
T^4 TL: outcome per new IC on T^4 (red = captured, green = escaped; squares = pursuer start and images)
projection on (x_1, x_2)
projection on (x_1, x_3)
projection on (x_1, x_4)
projection on (x_2, x_3)
projection on (x_2, x_4)
projection on (x_3, x_4)
by geodesic distance to the pursuer
captured (176)
escaped (824)
reach R = 0.88
new ICs
initial geodesic distance $|\Delta_0|$
errors against distance and cut locus
escaped
captured
capturable but escaped (3)
distance to the nearest cut-locus wall
$|\Delta_0|$
