(a) Convergence vs co-adaptation (3 seeds, capture-truncated loss)
oracle (fixed optimal evader)
self-play, 3:1 (paper baseline)
simultaneous 1:1 (GDA)
alternating best-response
capture radius ε
mean pursuit gap on capturable ICs
training fraction
(b) Cycling by protocol (dots = seeds)
late-training oscillation (s.d. of gap)
oracle
self-play 3:1
simul 1:1
